

INGUN Test Systems MDA-, Functional and Combi Test Systems

To enable us to combine our know-how in the Test System area better, since the beginning of 2007 we have concentrated this product division on one location. The previous separation in "Test Systems south" and "Test Systems north" no longer exists. All development and sales activities of our renowned MDA, Functional and Combi Test Systems are now carried out at Stadthagen (nr Hanover).

Many years of experience, innovative know-how and close contact to our customers are our strengths. Test us!

You can contact the division INGUN Test Systems under the following address:

INGUN Prüfmittelbau GmbH
Testsysteme
Industriestraße 6
31655 Stadthagen
